Sexuality in Medieval Europe

Doing Unto Others

Ruth Mazo Karras, University of Minnesota, USA

Sexuality in medieval Europe has become a vital scholarly field that is now recognized as central to the study of the Middle Ages. This new edition of the standard overview on the topic demonstrates that medieval culture developed sexual identities that were quite different from the identities we think of today, yet that were still in some ways ancestral to our own.

Using a wide collection of evidence from the late Antique period up until the fifteenth century, including newly added visual evidence, this informative and intriguing volume illustrates how sex in medieval times was understood, not as something that two people did together, but as something one person did to another. Consequently, gender roles and identities were seen

very differently from the ways our society defines them.

Sexuality in Medieval Europe is essential reading for all those who study medieval history and culture, or who have an interest in the way sexuality and sexual identity have be

Michael Brown, University of St Andrews, UK
 Series: *The Medieval World*

In this innovative analysis of a critical period in the history of the British Isles, Michael Brown addresses these fundamental questions and shows how the national identities underlying the British state today are a continuous legacy of these years. Using a chronological structure to guide the reader through the key periods of the era, this book also identifies and analyses the following dominant themes throughout. This is essential reading for undergraduates studying the history of late Medieval Britain or Europe, but will also be of great interest for anyone who wishes to understand the continuing legacy of the late medieval period in Britain.

Richard III

David Hipshon, St. James Independent School, UK
 Series: *Routledge Historical Biographies*

This new biography takes a nuanced view of the life and reign of one of England's most controversial monarchs, placing the scandals and mysteries that are so readily associated with Richard III in the wider context of the period in which he lived, and of the ever growing debate over his character.

Analysing the influences of those around him, his faith, literary interests and devotion to chivalric ideals, David Hipshon defines Richard's character as being central to the analysis of his actions. Incorporating new research on the feud between the Stanley and the Harrington families and previously unpublished material from the Duchy of Lancaster archives, this biography sheds new

light on a man who was very much a product of the time of change and complexity in which he lived.

Religion, Politics and Society in Britain 1066-1272

Henry Mayr-Harting
 Series: *Religion, Politics and Society in Britain*

Religion, Politics and Society 1066-1272 charts the many ways in which a constantly changing religious culture impacted on a social and political system which was itself dominated by clerics, from the parish to the kingdom. Henry Mayr-Harting introduces many of the great personalities of the time, such as Thomas Becket and Robert Grosseteste. At the same time he shows how religion itself changed over the course of two centuries, in response to changing social conditions - how rising population fuelled the economic activities of the monasteries, and how parish reform demanded a more educated clergy and by this increased the social prestige of the Church.

The Prophet and the Age of the Caliphates

The Islamic Near East from the 6th to the 11th Century

Hugh Kennedy, SOAS, UK

Series: A History of the Near East

The Prophet and the Age of Caliphates is an accessible guide to the history of the Near East from c.600-1050AD, the period in which Islamic society was formed. Beginning with the life of Muhammad and the birth of Islam, Hugh Kennedy goes on to explore the great Arab conquests of the seventh century and the golden age of the Umayyad and Abbasid caliphates when the world of Islam was politically and culturally far more developed than the West. A period of political fragmentation shattered this early unity, never to be recovered. General readers and scholars of early Islamic history will find this book a clear, informative and readable introduction to the subject.

The Cathars

Dualist Heretics in Languedoc in the High Middle Ages

Malcolm Barber, University of Reading, UK

Series: *The Medieval World*

Malcolm Barber's second edition of *The Cathars* (which first appeared in 2000) brings readers up-to-date with the challenges to previous conclusions of recent scholarship. At the same time, the wider implications of the subject remain relevant, most importantly the fundamental questions raised by the belief in the existence of evil, the ethical problems presented by the use of coercion to suppress forms of dissent believed to threaten the social and religious fabric, and the distortion of the past to underpin present-day policies and arguments.

Henry V

John Matusiak

Series: *Routledge Historical Biographies*

Henry V of England, who successfully defeated the French at the Battle of Agincourt, is one of the best known and most compelling monarchs in English history. This new biography takes a fresh look at his entire life and nine year reign, and gives a balanced view of Henry, who is traditionally seen as a great hero but has been more recently depicted as an obsessive egotist or, worse, a ruthless warlord. John Matusiak shows that the situation confronting Henry at the outset of his reign was far more favourable than is often supposed but that he was nonetheless a man of prodigious gifts whose extraordinary achievements in battle left the deepest possible impression upon his contemporaries.

Christian Jewish Relations 1000-1300

Jews in the Service of Medieval Christendom

Anna Sapir Abulafia, University of Cambridge, UK

Series: *The Medieval World*

Anna Sapir Abulafia's balanced yet humane account offers a new perspective on Christian-Jewish relations by analysing the theological, socio-economic and political services Jews were required to render to medieval Christendom. The book examines the impact of the Crusades on Christian-Jewish relations and analyses how anti-Jewish libels were used to define relations. Making adept use of both Latin and Hebrew sources, Abulafia draws on liturgical and exegetical material, and narrative, polemical and legal sources, to give a vivid and accurate sense of how Christians interacted with Jews and Jews with Christians.

The Cathars

Dualist Heretics in Languedoc in the High Middle Ages

Malcolm Barber, University of Reading, UK

Series: The Medieval World

Malcolm Barber's second edition of *The Cathars* (which first appeared in 2000) brings readers up-to-date with the challenges to previous conclusions of recent scholarship. At the same time, the wider implications of the subject remain relevant, most importantly the fundamental questions raised by the belief in the existence of evil, the ethical problems presented by the use of coercion to suppress forms of dissent believed to threaten the social and religious fabric, and the distortion of the past to underpin present-day policies and arguments.

Series: *Modern Wars In Perspective*

In *The Dutch Wars of Independence*, Marjolein 't Hart assesses the success of the Dutch in establishing their independence through their eighty years struggle with Spain. The volume investigates thoroughly the economic profitability of warfare in the early modern period and shows how smaller, commercialized states could sustain prolonged war violence common to that period. It moves beyond traditional explanations of Dutch success in warfare focusing on geography, religion, diplomacy while presenting an up-to-date overview and interpretation of the Dutch Revolt, the Anglo-Dutch Wars and the Guerre de Hollande.

Michael Mullett, Lancaster University, UK

Series: *Routledge Historical Biographies*

John Calvin is one of the most important figures in religious history. Sitting at the cusp of the medieval and early modern world, he was centre stage during the huge schism that split the early modern church. This new biography not only ties his life together with that of Martin Luther, but also stresses his individual contribution and influence. In examining his life and work, Mullett also explores the many significant influences on Calvin and his work, and the relationships that he formed along his 'reforming' path.

As well as exploring the impact of Calvin throughout the early modern period and the importance of his work to contemporaries, Mullett also assesses the impact that Calvin's works have had in shaping the modern world, and the relevance that they still have today.

Regulating Desire, Reforming Practice

Merry Wiesner-Hanks, University of Wisconsin, Milwaukee, USA

Series: *Christianity and Society in the Modern World*

The second edition of this pioneering work surveys the ways in which Christian ideas and institutions shaped sexual norms and conduct from the time of Luther and Columbus to that of Thomas Jefferson. areas. The chapters are divided into the three sections; ideas, institutions and effects, and key themes examined include marriage and divorce, fornication and illegitimacy, clerical sexuality, witchcraft and love magic, homosexuality and moral crimes. Henry VIII

Lucy Wooding, King's College London, UK

Series: *Routledge Historical Biographies*

Henry VIII was one of the most dominant figures of the sixteenth century, yet remains one of the most enigmatic. He was popular with the public and charismatic, yet behaved brutally in his private life and brought about England's break with the Catholic Church in order to get himself out of his first marriage.

Wooding's timely study provides an insightful and original portrait of this larger-than-life figure, and of the many paradoxes of his character and reign. This compelling new biography gives a fresh portrayal of Henry VIII, cutting away the misleading mythology in order to provide a vivid portrayal of this passionate, willful, intelligent, and yet fearful king.

Mary Tudor

Judith M. Richards, La Trobe University, Australia

Series: *Routledge Historical Biographies*

In this radical re-evaluation of the first 'real' English queen regnant, Judith Richards challenges Mary I's reputation as 'Bloody Mary' of popular historical infamy, contending that she was closer to the more innovative, humanist side of the Catholic Church.

Richards argues persuasively that Mary, neither boring nor basically bloody, was a much more hard-working, 'hands on', and decisive queen than is commonly recognized.

This illustrated and accessible biography is essential reading for all those with an interest in one of England's most

misrepresented monarchs.

Henry VII

Sean Cunningham, National Archives, UK

Series: *Routledge Historical Biographies*

Henry VII presents a short, accessible study of a much-studied British monarch. This new biography illuminates the life of Henry VII himself, how he ran his government, how his authority was maintained, and the nature of the country over which he ruled since he first claimed the throne in 1485.

Up until now the details of Henry as a person and as a king, his court and household, his subjects, and his country have remained little known. This book remedies that lack, and brings to the forefront the life and times of the very first Tudor king.

Gender and the English Revolution

Ann Hughes, Keele University, UK

In this fascinating and unique study, Ann Hughes examines how the experience of the civil wars in England changed both the role and conception of women and men in politics, society and culture. In a historiography predominately dominated by military or political approaches, *Gender and the English Revolution* reveals the importance of gender in understanding the events in England during the 1640-1650's. This book examines how traditional concepts of masculinity and femininity were called into question by civil war and the trial and execution of an anointed King. Parallels and analogies are drawn between marriage, the family and the state, and the impact of this period on the gendered thinking about politics and religion. *Gender and the English Revolution* will be an essential resource for anyone interested in women's history, feminism, gender or British History.

Charles I

Richard Cust

Richard Cust shows that Charles I was not 'unfit to be a king', emphasising his strengths as a party leader and conviction politician, but concludes that, none the less, his prejudices and attitudes, and his mishandling of political crises did much to bring about a civil war in Britain. He argues that ultimately, after the war, Charles pushed his enemies into a position where they had little choice but to execute him.

Rethinking the Black Freedom Movement

Yohuru R. Williams

Series: American Social and Political Movements of the 20th Century

In *Rethinking the Black Freedom Movement*, Yohuru Williams has synthesized the most important information about the Civil Rights Movement. He looks at the impact of the struggle for black civil rights on housing, transportation, education, labor, and voting rights, among other topics, to show that what is traditionally seen as a movement of the 1960s really extends back to the end of Reconstruction, and up through the present day.

Readers will come away with an increased understanding of the key figures and events in the movement for black civil rights, and how the key organizations within the movement interacted with other social movements of the twentieth century.

Haitian History

New Perspectives

Edited by **Alyssa Goldstein Sepinwall**, California State University, San Marcos, USA

Series: Rewriting Histories

Despite Haiti's proximity to the United States, Haiti barely registered in the historic consciousness of most Americans until recently. Those who struggled to understand Haiti's suffering in the earthquake of 2010 often spoke of it as the poorest country in the Western hemisphere, but could not explain how it came to be so.

Haitian History presents the best of the recent articles on Haitian history, by both Haitian and foreign scholars, moving from colonial Saint-Domingue to the Aristide years. It is the best

one-volume introduction to the field of Haitian history, helping to explain how the promise of the Haitian Revolution dissipated, and presenting the major debates and questions in the field today.

A Sourcebook of Black Civil Rights from 1862 to 1954

Christopher Waldrep, San Francisco State University, USA

In American history, the Judicial branch of government has had a monumental effect on the course of American history, and nowhere is this more apparent than in the area of civil rights. *Race and National Power: A Sourcebook of Black Civil Rights from 1862 to 1954* gathers together a collection of primary documents on the history of law and civil rights, specifically in regard to race. The sources covered include key Supreme Court decisions, some opinions from other courts as well, and texts written by ordinary people – the victims and perpetrators of racism and the lawmakers who wrote the statutes the courts must interpret. With helpful headnotes and introductions, *Race and National Power: A Sourcebook of Black Civil Rights from 1862 to 1954* is the perfect resource for anyone studying legal history or race in America.

African Americans and the Haitian Revolution

Selected Essays and Historical Documents

Edited by **Maurice Jackson**, Georgetown University, USA and **Jacqueline Bacon**

For generations of African Americans, the Haitian Revolution has been a vehicle through which collective memory and identity are created and transformed—an event that has inspired and influenced black nationalism, abolitionism, black socialist and revolutionary thought, and Pan Africanism. Bringing together essays and primary documents, helpfully annotated with headnotes and footnotes, *African Americans and the Haitian Revolution* collects not only the best recent scholarship on the subject, but also showcases primary texts written by African Americans about the Haitian Revolution. Rather than being about the revolution itself, this collection attempts to show how the events in Haiti served to galvanize African Americans to think about themselves and to act in accordance with their beliefs, and thus contributes to the study of African Americans in the wider Atlantic World.

Origins of the Black Atlantic

Edited by **Laurent Dubois**, Laurent Dubois is Professor of History at Duke University, USA and **Julius S. Scott**, Julius S. Scott is Lecturer in the History department at University of Michigan, USA

Series: Rewriting Histories

With the exception of the Spanish, all the European empires settled more Africans in the New World than they did Europeans. The vast majority of these enslaved men and women worked on plantations, and their labor was the foundation for the expansion of the Atlantic economy during the 17th and 18th centuries.

Origins of the Black Atlantic brings together some of the key contributions to the growing body of scholarship on the subject, showing a range of methodological approaches that can be used to understand and reconstruct the perspectives, daily experiences, hopes, and especially the political ideas of these enslaved people.

**Color Matters**

Skin Tone Bias and the Myth of a Postracial America

Edited by **Kimberly Jade Norwood**, Washington University, St. Louis, USA

Series: New Directions in American History

Despite advances, people are still discriminated against based on the color of their skin, with lighter skin equating acceptability. This skin tone bias, or colorism, is both related to and distinct from discrimination on the basis of race. *Color Matters* collects the most recent research on this insidious form of discrimination. Anchored with historical chapters showing how the legacy of slavery has shaped the treatment of skin color in American society, the contributors to this volume show how colorism affects us all. Sure to be an eye-opening collection for anyone curious about how race and color continue to affect society, *Color Matters* provides a wide-ranging overview of a crucial topic.

**Rethinking the Asian American Movement**

Daryl Joji Maeda, University of Colorado, CO

Series: American Social and Political Movements of the 20th Century

Although it is one of the least-known social movements of the 1960s and 1970s, the Asian American movement drew upon some of the most powerful currents of the era, and had a wide-ranging impact on the political landscape of Asian America, and the United States more generally. Using the racial discourse of Black Power and other movements of the time, as well as antiwar activist and the global decolonization movements, the Asian American movement succeeded in creating a multi-ethnic alliance of Asians in the United States and gave them a voice in

their own destinies.

Rethinking the Asian American Movement provides a short, accessible overview of this important social and political movement, highlighting key events and key figures, the movement's strengths and weaknesses, how it intersected with other social and political movements of the time, and its lasting effect on the country. It is perfect for anyone wanting to obtain an introduction to the Asian American movement.

Edited by Mario T. Garcia, University of California, Santa Barbara, USA

Series: New Directions in American History

While the Chicano movement of the late 1960s and 1970s is so far the most significant period in the history of Chicano civil rights, its story and legacy have only been sporadically studied. Recently, however, a new generation of historians has turned to this movement, in an explosion of interesting work. *The Chicano Movement* collects the many strands of this research into one readable collection. Bringing the story up through the 1980s, *The Chicano Movement* situates students in the middle of the Movement, and gives them many directions to follow in their understanding of what it means to be an activist, a Chicano, and an American.

The Chicano Movement for civil rights grew in tandem with other civil rights movements of the 1960s and 1970s. It took many forms, but was based on efforts of Mexican Americans to gain acceptance and equality and to express pride in their ethnic heritage. *Rethinking the Chicano Movement* seeks to combine several fields of Chicano and Mexican American research into a comprehensive, concise, and synthetic history that considers the movement within a national context, rather than as an isolated, regional issue that only concerned the American southwest. North American Borderlands

Edited by **Brian DeLay**, University of California, Berkeley, CA

Series: Rewriting Histories

The area between two countries has been called many things—frontier, backcountry, and most recently, the borderland. Even though borderlands are frequently located at the peripheries of empires and nations, they nevertheless shape how centers of national power define their relation to expansion, sovereignty, immigration, labor, community, difference, and race and ethnicity. *North American Borderlands* introduces students to exemplary scholarship on borderlands, focusing on borderland relationships spanning the seventeenth through the twentieth centuries. The collection presents the major debates and questions most prominent in the field today.

Communities and Cultures in Colonial America, A Sourcebook

Edited by **Louise A. Breen**, Kansas State University, USA

The field of colonial American history is an incredibly exciting area of study, but one that is often difficult for undergraduates to grasp. Over the last 25 years, there have been increasingly specialized studies done on particular colonial regions or themes, but there is no consensus on the narrative of early America, which makes the study of the period seemingly disjointed for students.

This book is the primary document sourcebook accompanying the *Converging Worlds* textbook. Each chapter author of the text has hand-picked documents that go along with the chapter they've written for the text. However, it would be just as easy for an instructor to use the sourcebook on its own, since there will also be a general introduction and section introductions framing the documents.

Jeff Crane, University of the Incarnate Word, San Antonio, USA

The Environment in American History is a detailed environmental history of America from the era prior to European contact to the present day. The American Culture of War

A History of US Military Force from World War II to Operation Enduring Freedom

Adrian R. Lewis, University of Kansas, USA

The American Culture of War presents a sweeping critical examination of every major American war since 1941: World War II, Korea, Vietnam, Operation Enduring Freedom, and Operation Iraqi Freedom. As he carefully considers the myriad cultural forces that surrounded each military engagement, Adrian R. Lewis offers an original, provocative look at the motives people and governments used to wage war, the discord among military personnel, the flawed political policies that guided military strategy, and the civilian perceptions that characterized each conflict. Still timely, incisive, and comprehensively updated in its second edition, *The American Culture of War* is a unique and

invaluable survey of over sixty years of American military history. A robust companion website includes helpful instructor and student resources.

America Before the European Invasions

Alice Beck Kehoe, University of Wisconsin-Milwaukee, USA

Series: *Longman History of America*

Beginning with the immigrants from Asia, through inventions of agriculture, cities and kingdoms, American First Nations are integral to the history of the United States. They explored the continent, pioneered its waterways and mountain passes, cleared forests, irrigated deserts, and ranched its great plains.

Invading Europeans justifies their conquests by denying the evidence of American Indian civilisations. Using her familiarity with the archaeological remains and remnants, Alice Kehoe builds a fascinating prehistory, highlighting the research puzzles along the way.

This book presents an enthralling look at the depth and diversity of American history - before the Europeans and the deadly epidemics they brought with them decimated whole nations.

Race and Immigration in the United States

New Histories

Paul Spickard, University of California, USA

Race and Immigration in the United States is a collection of the very best of the new generation of scholarship in the field of immigration history. The traditional Ellis Island model of immigrant assimilation is no longer adequate to understand American history. A more subtle model is needed—one which does not exclude peoples of color from view, nor treat the experiences of European immigrants as a template for the experiences of non-White migrants. In this important collection, Paul Spickard draws together essays that illuminate the crucial differences that race makes in the study of American history.

Premilla Nadasen, City University of New York, USA

Series: American Social and Political Movements of the 20th Century

The welfare rights movement was an interracial protest movement of poor women on AFDC who demanded reform of welfare policy, greater respect and dignity, and financial support to properly raise and care for their children. In short, they pushed for a right to welfare. Lasting from the early 1960s to the mid 1970s, the welfare rights movement crossed political boundaries, fighting simultaneously for women's rights, economic justice, and black women's empowerment through welfare assistance.

The Welfare Rights Movement provides a short, accessible

overview of this important social and political movement, highlighting key events and key figures, the movement's strengths and weaknesses, and how it intersected with other social and political movements of the time, as well as its lasting effect on the country. It is perfect for anyone wanting to obtain an introduction to the welfare rights movement of the twentieth century.

The Old South

New Studies of Society and Culture

In this book, the re-named second edition of *Society and Culture in the Slave South*, J. William Harris selects the most recent and original scholarship in the field of the antebellum South published since 1992, when the first edition appeared. The present volume illustrates both the continuities and new developments in antebellum Southern history, starting from the work of Eugene Genovese and Elizabeth Fox-Genovese, and moving into work that challenges their traditional reading of the slave South as a 'paternalist' society. The collection also features an introduction to the historiography of the slave South,

The New South

New Histories

J. William Harris, University of New Hampshire, USA

Series: *Rewriting Histories*

J. William Harris, the editor of Routledge's *The Old South: New Studies of Society and Culture*, aims in *The New South* to introduce students to the historiography of this later volatile period of southern history, which starts from the racial segregation prevalent after the end of the Civil War and continues through the Civil Rights Movements of the 1950s and 1960s. For many years, this historiography centered on the writing of C. Vann Woodward. Woodward remains an important touchstone in the field, but in *The New South*, Harris gathers the most significant scholarship illustrating the range of challenges to Woodward's

interpretation of the South, including the importance of place, the role of women, the significance of memory, and the story of the "long Civil Rights Movement." The collection also features an introduction to the historiography of the New South, and a Guide to Further Reading.

Civil War America

A Social and Cultural History with Primary Sources

Edited by **Maggi M. Morehouse**, Coastal Carolina University, USA and **Zoe Trodd**, University of Nottingham, UK

As war raged on the battlefields of the Civil War, men and women all over the nation continued their daily routines. They celebrated holidays, ran households, wrote letters, read newspapers, joined unions, attended plays, and graduated from high school and college. *Civil War America* reveals how Americans, both Northern and Southern, lived during the Civil War—the ways they worked, expressed themselves artistically, organized their family lives, treated illness, and worshipped. Along with the original material presented in the book chapters, the website accompanying the book is a treasure trove of primary sources, both textual and visual, keyed for each chapter

African-American Activism before the Civil War

The Freedom Struggle in the Antebellum North

Edited by **Patrick Rael**, Bowdoin College, Maine, USA

African-American Activism before the Civil War is the first collection of scholarship on the role of African Americans in the struggle for racial equality in the northern states before the Civil War. Many of these essays are already known as classics in the field, and others are well on their way to becoming definitive in a still-evolving field. Here, in one place for the first time, anchored by a comprehensive, analytical introduction discussing the historiography of antebellum black activism, the best scholarship on this crucial group of African American activists can finally be studied together.

A House Divided

The Civil War and Nineteenth-Century America

Jonathan Daniel Wells, Temple University, PA

The Civil War is one of the most defining eras of American history, and much has been written on every aspect of the war. The volume of material available is daunting, especially when a student is trying to grasp the overall themes of the period. Jonathan Wells has distilled the war down into understandable, easy-to-read sections, with plenty of maps and illustrations, to help make sense of the battles and social, political, and cultural changes of the era.

Students will also find helpful study aids on the companion website for the book. *A House Divided* provides a short, readable survey of the Civil War and the Reconstruction period afterward,

focusing not only on the battles, but on how Americans lived during a time of great upheaval in the country's history, and what that legacy has meant to the country today.

John Maynard Keynes is arguably the most important and influential economist of the twentieth century, and stands alongside Adam Smith and Karl Marx as one of the most famous economic thinkers of all time. Vincent Barnett emphasizes the relationship between the personal and professional by presenting his chapters in pairs, examining first the central features of Keynes' life, development and policy ideas over the period in question, and then the theoretical content of his major writings from the same period. The result is a concise new biography that is both intellectually rigorous and also easily accessible to students and anyone else seeking to understand

Focusing on the career of Margaret Thatcher, Eric J. Evans questions both the originality and the ideological coherence of Thatcherism. He argues that while Thatcherism was a bold experiment in an ideologically driven government that, despite Thatcher's political dominance, failed to meet its main objectives.

TEXTBOOK

Britain and World War One

Alan G. V. Simmonds, University of Hull, UK

The First World War appears as a fault line in Britain's twentieth-century history. Between August 1914 and November 1918 the titanic struggle against Imperial Germany and her allies consumed more people, more money and more resources than any other conflict Britain had hitherto experienced. These momentous events were the source of profound and radical change in British society; and yet, at the same time, the conflict left long-standing institutions and social attitudes largely untouched. In chapters looking at industry and the economy, the government in operation during the war, women's work, farming, popular culture and propaganda, Alan G.V. Simmonds focuses on the war as a civilian rather than a military experience,

interpreting the military dimension as a background for examining the conflict as a political, social and cultural experience. This is an essential book for all students of the First World War.

Understanding the Victorians

Politics, Culture and Society in Nineteenth-Century Britain

Susie L. Steinbach, Hamline University, USA

The Victorian era was a time of dramatic change. During this period Britain ruled the largest empire on earth, witnessed the expansion of democracy, and developed universal education and mass print culture. Both its imperial might and the fact that it had industrialised and urbanised decades before any other nation allowed it to dominate world politics and culture in many ways for the better part of the nineteenth century.

Understanding the Victorians paints a vivid portrait of the era, combines broad survey with close analysis, and introduces students to the critical debates taking place among historians today.

With a clear introduction outlining the key themes of the period, including the issue of periodisation, and with chronologies and suggestions for further reading, this is the ideal companion for all students of the nineteenth century.

The French Revolution

Faith, Desire and Politics

Noah Shusterman, Temple University, USA

The French Revolution: Faith, Desire, and Politics offers a fresh treatment of this perennially popular and hugely significant topic, introducing a bold interpretation of the Revolution that highlights the key role that religion and sexuality played in determining the shape of the Revolution. These were issues that occupied the minds and helped shape the actions of the people; from the pornographic pamphlets about Queen Marie-Antoinette to the puritanical morality of revolutionary leader Maximilien Robespierre. The people who lived through the French Revolution were surrounded by messages about gender, about sex and about faith.

The Irish Revolution, 1916-1923

Marie Coleman, Queens University, Belfast, UK

Series: *Seminar Studies*

This concise study of Ireland's revolutionary years charts the demise of the home rule movement and the rise of militant nationalism that led eventually to the partition of Ireland and independence for southern Ireland. The book provides a clear chronology of events but also adopts a thematic approach to ensure that the role of women and labour are examined, in addition to the principal political and military developments during the period. Incorporating the most recent literature on the period, it provides a good introduction to some of the most controversial debates on the subject, including the extent of

sectarianism, the nature of violence and the motivation of guerrilla fighters.

Spain, 1469-1714

A Society of Conflict

Henry Kamen, Higher Council for Scientific Research, Spain

For nearly two centuries Spain was the world's most influential nation, dominant in Europe and with authority over immense territories in America and the Pacific. Henry Kamen sets out to explain how Spain achieved the unexpected status of world power, and examines political events and foreign policy through the reigns of each of the nation's rulers, from Ferdinand and Isabella at the end of the fifteenth century to Philip V in the 1700s.

This completely updated fourth edition of Henry Kamen's authoritative survey of Spanish politics and civilisation in the Golden Age of its world experience expands the coverage of themes and takes account of the latest published research.

The Biography of the Myth

Antonio Cazorla-Sanchez, Trent University, Canada

Series: Routledge Historical Biographies

In this new biography Antonio Cazorla-Sanchez looks at Franco from a fresh perspective, emphasizing the cultural and social over the political. Explaining how his persona and actions were perceived by Spaniards and others, Cazorla-Sanchez presents a new understanding of how the dictator was portrayed by the propaganda machine, how the opposition tried to undermine his prestige, and what opinions, rumors and myths people formed of him.

Introducing an essential international dimension to the man and his regime, Cazorla-Sanchez's *Franco* exposes for the reader

the disorienting collective experience of living without freedom under the long shadow of a dictator

European Dictatorships 1918–1945

Stephen J. Lee and Stephen J. Lee

European Dictatorships 1918–1945 surveys the extraordinary circumstances leading to, and arising from, the transformation of over half of Europe's states to dictatorships between the first and the second world wars. From the notorious dictatorships of Mussolini, Hitler and Stalin to less well-known states and leaders, this book describes the course of dictatorship in Europe before and during the Second World War.

Following the great success and acclaim of the previous editions, the third edition of *European Dictatorships 1918–1945* has been thoroughly updated to include recent historical research. With new tables, maps and diagrams and a completely new chapter

on the meaning of dictatorship, this is the perfect survey for all students of the period.

The Global Atlantic

1400 to 1900

Christoph Strobel, University of Massachusetts, Lowell, USA

The Global Atlantic provides a concise overview of the complex and diverse history of the greater Atlantic region from 1400 to 1900. By integrating the Atlantic into world history, the book shows that the Atlantic oceanic system emerged as a fully globally-integrated structure, and explores how this global exchange and interconnectedness affected Europe and Europeans as well as Africa and Africans, and the Americas and Native Americans, and how it reshaped the world beyond. By discussing major examples and themes of how the Atlantic World was interlinked with the rest of the globe, *The Global Atlantic* provides students with a wide-ranging overview of a crucial topic in world history.

Origins of the Black Atlantic

Edited by **Laurent Dubois**, Laurent Dubois is Professor of History at Duke University, USA and **Julius S. Scott**, Julius S. Scott is Lecturer in the History department at University of Michigan, USA

Series: Rewriting Histories

With the exception of the Spanish, all the European empires settled more Africans in the New World than they did Europeans. The vast majority of these enslaved men and women worked on plantations, and their labor was the foundation for the expansion of the Atlantic economy during the 17th and 18th centuries.

Origins of the Black Atlantic brings together some of the key contributions to the growing body of scholarship on the subject, showing a range of methodological approaches that can be used to understand and reconstruct the perspectives, daily experiences, hopes, and especially the political ideas of these enslaved people.

The Atlantic Connection

A History of the Atlantic World, 1450-1900

Anna Suranyi, Endicott College, USA

The Atlantic Connection examines the major themes of Atlantic history from 1450 to 1900. During this period, ships, goods, diseases, human beings and ideas flowed across the ocean, tying together the Atlantic basin in a complex web of relationships. Divided into five main sections, this book considers key cultural themes such as gender, social developments, the economy, and ideologies.

The Atlantic Connection is shaped by its exploration of a key question: how did Europe come to dominate the Atlantic? Adeptly weaving a multitude of events into a larger analytical narrative, this book will be essential reading for students of Atlantic history.

Series: Themes in World History

Opening with a clear discussion of the problems of defining slavery, the book goes on to investigate the Atlantic slave trade from its origins to abolition, including comparisons to other systems of slavery outside the Atlantic region and the persistence of modern-day slavery. In a vital and accessible narrative, *The Atlantic Slave Trade in World History* enables students to understand this terrible element of human history and how it shaped the modern world.

Early North America in Global Perspective

Edited by **Philip D. Morgan**, Johns Hopkins University, USA and **Molly A. Warsh**, University of Pittsburgh, USA

Series: Rewriting Histories

The field of Atlantic History transformed the study of colonial America, bringing to light the connections between the Americas, Africa, and Europe. *Early North America in Global Perspective* collects together the most interesting and innovative of the various strands of scholarly argument for student use. Here in one place, anchored by a robust introduction that explains the various conceptual arguments, students can read the words of historians from different viewpoints, in order to shed light on America's place in the world, without subsuming the history of North America into the larger narrative of the Atlantic World.
